

WHAT IS CLAIMED IS:

1. A power transmission fluid composition which comprises:
  - (a) a major amount of an oil of lubricating viscosity;
  - (b) an effective amount of a power transmission fluid performance additive package; and
  - (c) a static friction reducing amount of a member selected from the group consisting of the reaction products of maleic or succinic acid or anhydride or a C<sub>1</sub>-C<sub>6</sub> alkyl substituted maleic or succinic acid or anhydride with a primary aliphatic amine of the formula R-NH<sub>2</sub> wherein R is a C<sub>4</sub>-C<sub>30</sub> hydrocarbyl group.
2. The composition of claim 1 wherein the product is derived from a maleic acid or anhydride.
3. The composition of claim 1 wherein R is a C<sub>12</sub>-C<sub>22</sub> alkyl.
4. The composition of claim 1 wherein there is present 0.01 to 10 wt.% of the reaction product.
5. The composition of claim 1 wherein the amine is octadecyl amine.
6. The composition of claim 1 wherein the imide is formed from maleic anhydride or methyl succinic anhydride.
7. A power transmission device containing the composition of claim 1.
8. An automatic transmission apparatus containing the composition of claim 1.
